

Albert Wong
Chief Commercial Officer,
GE China

Albert holds a Bachelors degree of Electrical Engineering from the University of Hong Kong and an MBA from the Chinese University of Hong Kong. Prior to GE, Albert had a number of years with other multinationals including Schlumberger, Caterpillar, Emerson and PerkinElmer.

Albert joined GE in March 2000, and started as a Product Line Leader and Integration Manager in Asia for the then GE Industrial Systems. He also spent 20 months in Plainville CT, USA, as the BD Manager to complete the first Sensing acquisition for GE in 2001. Then he took on increasingly important positions in marketing, BD and sales. In 2004, Albert was named the China Commercial leader for GE Sensing, which was later integrated into GE Sensing & Inspection Technologies, and he was appointed as the China leader. Advocating 'localization' and 'simplification', Albert led the business to achieve consistent and significant growth every year for 6 years in China.

From January 2008 to Dec 2009, Albert concurrently held the China leadership position for GE Enterprise Solutions, a global \$5B business comprising of Sensing & Inspection Technologies, Security, Intelligent Platform and Digital Energy. Being an inclusive leader, Albert actively delegated to involve his team in championing goals and objectives. In a tough economic environment, he led the China team to deliver solid revenues, build a culture of compliance and position the business for long-term growth.

In September 2009, Albert received a 2009 'Hero of Growth' award from GE Chairman and CEO Jeff Immelt.

Albert is currently GE's Chief Commercial Officer for China, reporting to John Rice, Vice Chairman of GE. As the Commercial Leader of GE in China, he is committed to advancing GE's business growth in China to a new level.
